Summary

As a software engineer with 3 years of professional experience, I am passionate about developing innovative solutions that solve complex problems. My expertise includes designing and developing scalable applications, collaborating with cross-functional teams, and implementing best practices in software development.

Last 5 years of studying have become for me a great opportunity to try myself in such fields of IT as backend, frontend, mobile, cross platform and low-level development, data science, design, information security and reverse engineering. Nowadays I am working on my graduation work about methods for bypassing blocking of Internet resources and Internet censorship by traffic proxying, tunneling and obfuscation, as I am for freedom in the internet.

In my career I am looking to enhance my technical skills in backend development, software design, testing and implementing reliable and secure systems. For now, I am exceedingly interested in studying cluster and cloud solutions for developing and deploying scalable high-performance applications. I extremely like creating software products that are wonderful both for a glance of users and developers. That's why I am always open for any offers to create something that could be useful for people or even change the world for the best.

Experience

Lead Backend Developer
T. Hunter

Jun 2023 - Present (2 months)

Design and development of new modules for the OSINT platform for analyzing and evaluating the collected data;

Adding new product functionality in accordance with business requirements;

Expansion of the system with new crawlers and data parsers;

Maintaining and rewriting legacy code

Full Stack Engineer
Фриланс

Jul 2020 - Present (3 years 1 month)

Developing a web application on the Mongo Express Vue Node stack.

Creation of a server-side CRUD application.

Using the concept of a SPA to implement a selling service.

Using AWS and Docker to Deploy a Microservice Application.

Backend Developer
ООО "Комфортел"

Aug 2022 - Jul 2023 (1 year)

Backend engineer with speciality in restfull APIs, network security and backend development.

Implementing and testing server side part of smart home and IoT management application.

Implementing microservice architecture with Nest.js, Keycloak, Kafka, HTTP and MQTT.

Full Stack Engineer
InfoTeCS JSC

Mar 2022 - Aug 2022 (6 months)

Design and development of the website.

Testing high performance crypto-network for transactions.

Technical Specialist
Freelance, Self Employment

Jul 2016 - Aug 2018 (2 years 2 months)

Was engaged in the repair and consulting on the purchase / repair of digital equipment.

Education

Saint Petersburg State Electrotechnical University "LETI"
Engineering Specialist Diploma, Security of Computer and Information Systems / Cyber Security

2018 - 2024

Licenses & Certifications

Course "Probability Theory and Mathematical Statistics" - St. Petersburg State Electrotechnical University "LETI"
PROTH-0120-061

Skills

TypeScript • NestJS • Jest • RabbitMQ • Apache Kafka • Microservices • JavaScript • Go (Programming Language) • Python (Programming Language) • Team Leadership
